ELIZABETH KAREN

Email | Website | Github | LinkedIn | Medium | New York, New York | 609 558-1491

SOFTWARE ENGINEER

Experienced in Ruby on Rails and JavaScript based programmer with a background in product development.

TECHNICAL SKILLS

Proficient in Ruby, Rails, React, Redux, JavaScript, Python, RSpec, REST API, CSS, HTML, PostgreSQL, and SQLite

TECHNICAL PROJECTS

Movie Search - Github | Demo   1/2021
Simple React website where you can search movies and pick five favorites.
- Developed search engine using movies API.
- Utilized Local Storage to enable the user to save 5 movies as favorites.

Text Message API - Github   11/2020
Self-testing API in Rails using PostgreSQL.
- Created scripts to test application code using RSpec gem for project specifications.
- Created custom route's for users adding to the database.

Trivia Game - Github | Demo   10/2020
Ten Question Trivia Game.
- Randomized 21 question JSON file to render in unique order every game.
- Used React Components so all questions and answers stay on the screen with the answer highlighted.

Zodiac Game - Github | Demo   8/2020
Simple React website tells you your sign and fortune.
- Developed algorithm that outputs Chinese and western Zodiac sign when given a birthdate.
- Utilized React Routes and JavaScript time delay method to output unique fortune.

Etsy Clone - Github | Demo   6/2020
Etsy clone allows users to buy, sell, and review products with Rails backend and PostgreSQL database.
- Built React frontend which utilized lifecycle methods to ensure trending items updated every 9 seconds.
- Created charts using JavaScript so users can see how many clicks their items received.

So Not Facebook Social Network - Github | Demo   5/2020
Old school Facebook clone.
- Created user log in/sign in methods that blocked non-users from seeing the website.
- Built Rails backend using SQLite with users' API where all CRUD functions are saved.
